

# DEVASTATED WATERFRONT IN STRICKEN YOKOHAMA

When the Bottom of the Sea Rose Up, Making Nearly Useless the Great Maritime Harbor of Yokohama, Japan. Photograph shows strikingly the devastating effect of the temblor and tidal wave at Yokohama. At the left is the Empress of Australia at the dock. Below her, to the right, are a number of automobiles hurled from her deck by the force of the quake. Note that some of them have their front wheels nearly in the water. The next pier is almost high and dry because of the rise in the harbor floor and the consequent recession of the water. In the harbor some of the vessels have listed heavily to one side, indicating that their keels are now touching bottom. This picture and others in this issue of The Times were brought to Seattle by refugees aboard the President Jefferson and were rushed to Los Angeles by Army airplanes piloted by Corp. Robert Patt, from Seattle to Los Angeles, and by Maj. George Brett, commander of Crissey Field, from San Francisco to this city. Photos copyrighted by the Los Angeles Times and P. & A. Photos.

## SECOND DAY OF MARTIAL LAW QUIET IN OKLAHOMA

**Officers Placed Only at Capital and Tulsa; Military Court Inquiries Begun**

(BY A. P. NIGHT WIRE)  
OKLAHOMA CITY (Okla.) Sept. 17.—Its two largest cities actually occupied by the military, Oklahoma passed its second day under martial law today without disturbance. No activity was visible in the State, except at Oklahoma City, where the military investigation into acts of mob violence undoubtedly will center in Oklahoma City, where the Governor charged in his proclamation of martial law, the organization of the Ku Klux Klan emanates to all parts of the State.

Adjourning late today after interviewing only a few witnesses the military court is expected to begin tomorrow an extensive investigation into masked activities either directed or executed at Oklahoma City. In this connection, observers pointed out that only two instances of mob violence have been brought to light here during the last two years; the lynching of a negro during the strike of packing house workers and the beating of a physician about six months ago.

**KLAN OFFICE OPEN**  
State headquarters of the Ku Klux Klan remained open today but no statement was made by officials as to the organization's attitude toward the Governor's declaration of martial law. Gov. Walton declared in his martial law proclamation that Oklahoma City was the headquarters of the Ku Klux Klan in Oklahoma and that "it is here where the Klan is organized and controlled."

**NO KKK IN OKLAHOMA**  
Gov. Walton, however, said that the Klan was not in Oklahoma. He said that the Klan was not in Oklahoma and that the Klan was not in Oklahoma. He said that the Klan was not in Oklahoma and that the Klan was not in Oklahoma.

## JAPAN WILL GO FORWARD DESPITE TEMBLOR LOSS

**Reconstruction Cost Estimated to be Less Than 2 Per Cent of National Wealth**

(BY ARTHUR SEARS HENNING)  
(BY CABLE—EXCLUSIVE DISPATCH)  
WASHINGTON, Sept. 17.—Japan's position in world affairs will be negligibly affected by the economic losses resulting from the earthquake and by the burden of rehabilitation, in the opinion of officials here who have made a special study of the far eastern situation.

Japan, they are convinced, will move steadily forward to domination of Eastern Asia and the Western Pacific, which domination already is within the grasp of Nippon, and in the process of realization of that aim will find but slight embarrassment in the reconstruction undertaken at home.

Whether relations between Japan and the United States will be permanently influenced by the period of good feeling produced by America's spontaneous response to the need of succor and Japanese gratitude therefor is a question on which there is varied speculation.

**RECENT DISCRIMINATION**  
It is noted that a well-developed movement to exclude the admission of all orientals to this country is afoot on the Pacific Coast, where double the Red Cross quota for Japanese relief was subscribed. The Japanese resent this proposed discrimination and conceivably would not permit their sense of gratitude to interfere with the adoption of measures designed to deter the United States from barring all Nipponese.

In other quarters it is predicted that the quick and abundant relief of the earthquake victims by the United States will produce a profound and lasting effect on the Japanese people and that the Japanese government will find it cannot count on public support of an attitude unduly critical of America.

Reports received from Japan indicate that the Japanese were greatly impressed by the fact that the first aid to reach the earthquake region was brought by the American Navy, which they had been taught to believe they never would behold except in battle.

## BERKELEY FIRE DESTROYS 500 HOMES AND TAKES TOLL OF DEAD BEFORE CONQUERED

**Gale-Fanned Flames Sweep Through Best Residence Section of City; State University Threatened by Blaze, Inhabitants Driven Into Streets; Loss Enormous**

(BY A. P. NIGHT WIRE)  
BERKELEY (Cal.) Sept. 17.—Fire sweeping over the hills east of Berkeley this afternoon, laid waste the Cragmont and Euclid avenue districts, destroying at least 500 residences within an area estimated at fifty blocks in extent, in one of the choicest residential sections of the city. At 7 p.m. the flames were believed to be under control.

Two students were seen to plunge into a vortex of fire and were believed to have lost their lives when the roof of a house, upon which they had climbed, collapsed. Several persons were hurt, but not seriously, it was said.

Hundreds of frenzied residents fled from the burning area as the fire swept down the slope of the hills, burned its way through the closely settled and exclusive district and eventually died down to a smoldering ring of flames encompassing the entire area which it had devastated. The prosperous residential section was a smoky waste.

The advance of the fire, which broke out early today in brush in Contra Costa county, was heralded by ugly gray clouds of smoke which swept over the brow of the hill, driven by a brisk wind and blanketed the city of Berkeley, throughout the morning and early this afternoon.

At 2 o'clock the flames had reached the crest of the ridge upon which stood the Cragmont district, many of Berkeley's wealthiest citizens. A host of volunteer firefighters already was at work in an effort to extinguish the flames, but a high wind sweeping toward them hampered their efforts and they made little headway.

Within an hour the conflagration had eaten its way into the outer fringe of exclusive homes on the hillside and was spreading in three directions, wreaking havoc as it advanced.

The Berryman Reservoir district was completely wiped out, and the flames progressed down the slope toward the bay and north toward the University of California.

**HOUSEHOLD HELPLESS**  
Householders whose homes were threatened by the flames made desperate attempts to prevent their residences catching fire, but their efforts proved unavailing until this evening when the fire at last was got under control.

At the flames progressed, and it became certain that vast destruction probably would result unless they were checked, hurry calls were sent out for volunteers to fight the fire and all available firefighting apparatus in Berkeley, Oakland and nearby cities were mobilized and hurried to the scene of conflagration.

The utmost confusion reigned in the fire zone and in the district for blocks surrounding the area. Hundreds of residents whose homes were many blocks removed from the danger zone, hastily gathered together such belongings as they could collect and fled with them to areas where it was believed the flames would not reach. Hundreds of automobiles were jammed the streets on the edge of the constantly enlarging fire zone.

**REMEMBER THIS**  
BY H. M. STANFORD  
A fellow never appreciates being up and out until he is down and in.

**STATE GETS ITS CASE**  
PHOENIX, Sept. 17.—Nearly \$30,000 has been received by the State Treasurer from surety companies that bonded State funds in the Stockmen's Bank of St. Johns and the Farmers' and Merchants' Bank of Tempe.

**NO FOG IN CHANNEL**  
Lieutenant-Commander Lawrence Wilde, chief communications officer of the Delphy, the destroyer flagship, which led her sisters into the maw of that offshore graveyard, started the hearing with a direct statement that it was not fog at the time of the crash and that fog signals had not been used at any time by the squadron. Heretofore the curling blanket of mist which blanketed the scene of the wreck at daybreak had been given

**OFFICERS DEEPEN MYSTERY OF DESTROYER DISASTER**  
Communication Officer of Delphy Declares There Was No Fog; Inquiry Is Opened

(EXCLUSIVE DISPATCH)  
SAN DIEGO, Sept. 17.—Entangled in a web of conflicting evidence, the mystery of the wrecking of seven destroyers on the jagged rocks of Honda Bay deepened measurably today as the result of the first testimony taken by the naval board of inquiry which is investigating this, the most important disaster in modern naval annals.

Of all the theories advanced so far by naval and shipping men, none have been brought forward by witnesses or in the reports of the commanding officers of the vessels as the true cause of the wreck.

Considerable stress was laid on testimony as to the possibility of the squadron receiving erroneous radio compass bearings from Point Arguello and other radio light-houses, but this, again, was denied in other relations as to the true facts underlying the case.

**SENSATIONAL REVELATIONS**  
Members of the board and officers present confessed themselves as distinctly puzzled over the wreckage at daybreak had been given

# Temblor's Destruction Along the Water Front at Yokohama

## NIPPON WILL RECOUP LOSS

Progress Expected Despite Results of Temblor

Aid From United States is Surprise to People

American Navy First to Send Help to District

(Continued from First Page)

THE American warships even preceded the Japanese Navy in getting relief to the scene and an American destroyer, No. 217, made two trips to Tokio, bringing refugees away from the shattered, smoking capital after the Japanese naval authorities had refused to risk a ship on the perilous undertaking.

**NAVY GIVES AID**  
Admiral Benzon, commander of the American Asiatic Fleet, acted, it turns out, without awaiting orders from Washington. When he heard of the disaster he ordered all ships full speed to Yokohama and commanded all American government shipping and supplies at Cebu and Shanghai.

The Navy which rendered this service expected up to a year and a half ago to be fighting Japan not earlier than 1924 nor later than 1927. The information in possession of our Navy Department indicated that Japan was preparing to make war some time between those years and it was not doubted that the preparations were aimed at the United States.

Then came the Washington Arms Conference, having naval construction, Japan a free hand to the Far East and allowing the United States and Great Britain in a Pacific pact. That changed the situation and everybody said war between Japan and the United States had been averted.

If Japan were still in a mood to plan war on the United States it would not be deterred by the earthquake disaster and the effects thereof, in the opinion of the best informed officials here. It is pointed out that no nation ever has been crippled by a great disaster and no disaster has deterred a nation from making war.

**WAR MORE TROUBLE**  
In toll of lives and wealth the World War was a far greater disaster to numerous countries than the Japanese earthquake, yet such losses have not deterred Italy, Greece, Russia, Poland, Japan, Serbia, Turkey, Rumania, Hungary and France from making other war or preparations for war. If Japan were still in a mood to plan war on the United States it would not be deterred by the earthquake disaster and the effects thereof, in the opinion of the best informed officials here. It is pointed out that no nation ever has been crippled by a great disaster and no disaster has deterred a nation from making war.

## DESTROYERS NOT IN FOG

(Continued from First Page)

RESULTS of the day's inquiry—most all are agreed over the possibilities of the disaster in sensational revelations. For tomorrow so many witnesses are scheduled for examination that it is felt that surely the truth will come out.

Twelve names were placed on the list of defendants at the opening of the inquiry today. They are the commanding officer of the squadron, the commanders of the two destroyer divisions in the wreck and the commanding officers of each boat. Their names follow:

Capt. Edward H. Watson, commander destroyer division thirty-three.  
Capt. Robert Morris, commander destroyer division thirty-three.  
Capt. William F. Fyfe, commander destroyer division thirty-three.  
Commander Louis F. Davis, commanding officer U.S.S. Woodbury.  
Commander William F. Gaddis, commanding officer U.S.S. Sumner.  
Commander William P. Calhoun, commanding officer U.S.S. Young.  
Commander William H. Toas.

**BALDNESS IS NEEDLESS**

Before Our Treatment After Our Treatment

**WE GROW HAIR, Proven Beyond a Doubt**

You don't have to be bald—unless you want to. We have proved it to over 600 here in Los Angeles in the past six months. Our scientific process positively grows hair on bald heads. New hair is born from 1 to 2 inches.

**Legal Written Guarantee**

We tender a guarantee to grow new hair on bald heads or spots where hair formerly grew, or your money refunded.

**Dandruff, Falling Hair and Itching Scalp**

are treated with our scientific process. Our scientific treatment cures dandruff and itching scalp and restores growth and color to hair, and stops all dandruff, itching scalp and falling hair. Examination free.

Two Unusual Pictures of Ruin Wrought by Earthquake in Japan

The top picture shows the wreckage of docks and piers at Yokohama. The one below shows what happened when the earthquake hurled a large steamship against a concrete dock. Photos copyright by the Los Angeles Times and F. & A. Photos.

commanding officer U.S.S. P. Lee, Lieutenant-Commander John F. McClain, commanding officer U.S.S. Farragut.

Lieutenant-Commander Donald F. Hunter, commanding officer U.S.S. Delphy.

Lieutenant-Commander Walter D. Reed, commanding officer U.S.S. Fuller.

Lieutenant-Commander Herbert C. Rosch, commanding officer U.S.S. Nicholas.

Lieutenant-Commander Richard H. Dwyer, commanding officer U.S.S. Chaney.

Others are expected to be added to this list shortly.

**CREWS QUESTIONED**

The board convened at the naval air station at 10 o'clock and immediately adjourned to the destroyer base. There the various crews of the ships involved in the crash were mustered before the board and in each case the report of their commanding officers read before them. Then they were asked if individually or collectively there was any complaint or if anyone had information to give at the hearing. This being purely a formal matter, all the crews replied in the negative.

The reports of the commanding officers which it was first thought might contain considerable valuable information as to the cause of the wreck, were likewise purely formal relations of events occurring before and after the wreck.

In these reports, however, numerous officers and enlisted men were warmly commended by their commanding officers for work accomplished during those dark hours following the smashup on the docks.

**VISIT DESTROYERS.**

At noon the board adjourned for one hour. Following the recess the board returned to the destroyer base, where a procedure similar to that employed with the other ships was followed, after which the board left for North Island.

The board of inquiry is directed by Rear Admiral Sumner E. Y. Kittell, commander of all destroyer squadrons of the battle fleet, and is to include in its findings a full statement of the facts it may deem necessary to establish, and "to further give its opinion as to whether any officers have been committed or serious than occurred and in case its opinion is that offenses have been committed or serious blame incurred, will specifically recommend what further proceedings should be held."

These instructions it is believed, will be followed by the court to the letter. The inquiry is very busy.

Explaining his Saturday night declaration of absolute martial law for Yokohama, he said that the board of inquiry had "kept the Kian grand jury that had been called" to convene today.

The movement to take the pardon and parole power from the Governor is for no other reason than as retaliation for the correction of the Governor in Tulsa, said Gov. Walton. "I have sent four men to the penitentiary from Tulsa, and 100 more are on the way. They will not be pardoned or paroled."

**PETITION PAILS**

The Governor's reference was to an initiative petition recently circulated which would have vested pardon and parole power in a board instead of in the Governor. As at present, the petition failed for lack of sufficient signatures.

Defending his clemency program by which 241 convicts have been released from the State penitentiary since the beginning of his term in January last, the Governor declared that "the corrupt press of the State exaggerated the case and conveniently forgot to say anything about those who deserve pardons and paroles."

**TULSA (Ola.)** Sept. 17.—District Judge Albert C. Hunt today ordered A.M. Gen. Markham to appear in court here Wednesday morning at 9 o'clock with Ben and Grover Skiles and Earl Clark, confessed whippers under sentence to the penitentiary, but now held as military prisoners. At that time arguments upon writs of habeas corpus would be heard. Applications for their release were filed late Saturday. The allegations being that they are held illegally by the military authorities.

**GLACIER PARK POPULAR**

WASHINGTON, Sept. 17.—The 1922 Glacier House was the heartiest in the entire ten years history of Glacier National Park, according to the report of Capt. J. H. Eakin. This year's attendance exceeded last year's by nearly 13,000 tourists, an increase of about 60 per cent.

**BACKED BY 'WORLD'**

HENRIETTA (Ola.) Sept. 17.—The Ku Klux Klan constitutes an "archaic force" in Oklahoma and must be driven from the State, Gov. Walton told an audience of 1000 persons many of them delegates to the Klan labor convention here today.

The fight on the Klan is no longer a religious affair. The organization is attempting to control the government of the entire State, the Governor declared.

The Tulsa World is backing him in his fight against the invisible empire, though "nearly all the other editors, reporters and newspaper men in Oklahoma are members of the Klan," the Governor asserted.

Explaining his Saturday night declaration of absolute martial law for Yokohama, he said that the board of inquiry had "kept the Kian grand jury that had been called" to convene today.

The movement to take the pardon and parole power from the Governor is for no other reason than as retaliation for the correction of the Governor in Tulsa, said Gov. Walton. "I have sent four men to the penitentiary from Tulsa, and 100 more are on the way. They will not be pardoned or paroled."

## BERKELEY HIT BY GREAT FIRE

Five Hundred Homes Are Burned; Two Fatalities

Great Blaze Fanned by High Wind Responsible

Dynamite Used in Effort to Check Flames

(Continued from First Page)

THE fire carrying refugees who had been left homeless by the flames and others carrying squads of volunteers who lent their efforts to attempts to extinguish the flames.

For four hours between 2 o'clock and 6 o'clock this afternoon the flames raged virtually unchecked, despite the efforts of several hundred firemen and volunteers and scores of householders, many of whom stood to their chests with garden hose or buckets striving vainly to halt the fire's attack on their homes until they were driven away by the approaching flames.

It was not until the setting sun began to paint the sky a weird dark red that the wind showed signs of abating. Shortly after 6 o'clock it subsided somewhat and workers were able to make more progress against the flames. By 7 o'clock they had succeeded in gaining control of the fire on Ridge Road and Hearst Avenue on the north and on that street and a newspaper man's car drove over the flames, some of them burning.

For several blocks the fire cut branches from trees and other miscellaneous debris, including the charred remains of a parlor settee, were seen as they traveled this street.

The fire made the great trees of the street look like giant sentinels, their branches and leaves scorched and their trunks blackened.

At the intersection of Hearst Avenue and University Avenue, the fire was barred by police personnel. The fire crossed this street at two different times, but apparently did little serious damage on the west side.

**PATH OF FLAMES**

At the intersection of Hearst Avenue and University Avenue, the fire was barred by police personnel. The fire crossed this street at two different times, but apparently did little serious damage on the west side.

Down the hills as far as possible, as far as the fire worked its way, but where the trend of the wind shifted, it crossed the direction of the wind, the path of the flames was further back up the hill.

Berkeley was invaded by nearly a hundred friendly disciplinarians, headed by Oakland's police department, who added by hundreds of cheerful college boys or paunchy businessmen volunteers kept traffic from the street.

The same Oakland police officers virtually took possession of Berkeley's police station, making it headquarters for a score of various varieties of police work.

Some clattered at the doors and sat there for hours to get through the fire lines to their homes or where their homes had been. Some were working for word of the fire spread and the probable amount of damage to their properties, other some were and brought information of their relatives and friends.

**SCHOOL GIRLS HELP**

Half a dozen Berkeley high school girls, members of a club which had made public work a hobby, aided in the work of answering questions and leading lost persons. They were kept busy, they said, to estimate how many persons had appeared to them.

Berkeley's fire stations, too, presented a picture of activity. Engines that usually were as trim and shining in red paint and brass were dirty, blackened with chemical grime with smoke and soot from overheated oil. Each made many trips to and from the stations in the early hours of the fight against the fire, for water was scarce at many of the hillside points where the fire raged and chemicals were used freely, each

engine being refilled with water pulled up from the city mains. The Oakland fire department, too, was called in to assist in the fighting of the flames.

While it lasted, it was the greatest disaster in the history of the city. The fire destroyed more than 500 homes, and the damage was estimated at \$10,000,000.

TUESDAY MORNING, SEPTEMBER 18, 1922.

Fighting the flames, by this time almost under control, proceeded with more efficiency and dispatch. The arrival of a corps of 100 soldiers from Fort Scott also aided in allaying the difficulties situation, and rapidly eliminated much of the confusion.

The ruined area was known as the most beautiful district in Berkeley. Hundreds of refugees, sightseers and volunteer workers, who stole a moment from their work of relief or of directing, walked out the first day and night of the disaster, looking on the scene of destruction.

While it lasted, it was the greatest disaster in the history of the city. The fire destroyed more than 500 homes, and the damage was estimated at \$10,000,000.

## GRUPP TO BUY IN MEXICO?

Current in Capital That Steel Works Will be Purchased by German Munitions Firm

BY JACK STARR-HUNT  
(EXCLUSIVE DISPATCH)

MEXICO CITY, Sept. 17.—That the famous German munition firm, Krupp, is negotiating for the purchase of the Monterrey Iron and Steel Works, located within 100 miles of the United States border, is the subject of a report secured today from a reliable source.

The Krupp interests already hold an American plant operating in Mexico City. The National Bank of Mexico holds a heavy mortgage on the Monterrey plant.

It is understood that reports of the activities of the German emigration have been forwarded to the United States government at Washington, and that a close watch is being kept by Washington on the proposed purchase of the Monterrey plant.

While it is stated, it is believed that the Krupp interests are not likely to succeed in their negotiations, as the United States government is not likely to approve of the purchase of the Monterrey plant.

It is believed that the Krupp interests are not likely to succeed in their negotiations, as the United States government is not likely to approve of the purchase of the Monterrey plant.

It is believed that the Krupp interests are not likely to succeed in their negotiations, as the United States government is not likely to approve of the purchase of the Monterrey plant.

## PHOTOS COME FROM JAPAN

Army Plane Wins Spectacular Race Against Weather and Time from Seattle to Los Angeles

At just 3 p.m. yesterday afternoon an army De Havilland airplane with Maj. George H. Brett at the stick roared into Clover Air Field, Santa Monica, and delivered the first pictures of the Japanese earthquake and fire disaster, to a Times reporter. Twenty-one minutes later a fast automobile had placed the pictures in the Times office at First street and Broadway and ended one of the most spectacular battles ever fought by a newspaper against distance, weather and accident.

The first pictures of the Japanese earthquake were landed by Times reporters who boarded the S.S. President Jefferson at Williams Head, B. C. The pictures touched land late last Saturday night and were rushed at once to Victoria, B. C., by airplane. From Victoria a second airplane flight

One hundred miles and 100 hours were rushed to the Times headquarters early this morning and it is believed they will be of great value to the public. The pictures show the extent of the damage to the city of Seattle, and the extent of the damage to the city of Los Angeles.

# More Facts For Business Men and Bankers to Think About

1. Every banker will tell you and prove that he has no badly extended loans—His bank was never in finer condition, nor the finances of the whole country sounder—
2. Crops are abundant. Prices are fair—higher than a year ago—except for wheat, and wheat represents only 6% of the value of farm products—
3. Manufacturing has added enormously in the past year to the fixed assets of the country. The soundness of its management is displayed in moderate inventories and a rapid flow of both raw materials and manufactured products—
4. The railroads of the country are hauling a volume of freight never before equalled—
5. Yet retail stocks are low. Here is a fact of greater significance than is generally recognized. And retail buying is active generally—
6. Unemployment is practically nil. In many sections there is an actual labor shortage. Labor is reasonably content,

and is showing an increased per capita output—

7. The American Business Man has shown consistent caution and vigilance. Since 1920 he has proceeded sanely and soundly, thereby avoiding any serious over-expansion.

Those things are substantial. They are facts. They give more than a reasonable background for optimism toward a continuation of the Prosperity that is with us.

We frankly recognize that the disturbances and blighting influences of the World War may require a decade to overcome entirely.

We as frankly deprecate indulgence in the engaging conversational side of "normal business cycles", standards of living, European situations and other frightening phrases.

For the fundamental factors of Prosperity in this country are so sound that we believe there need be no fear of a repetition of the conditions of 1920.

*Again we say: The country, from every standpoint so far as we can see, is fundamentally sound*

# MURDER VICTIM IDENTIFIED

Search for Slayer Began as Meager Clue Reveals  
Torn Body as That of Aged Oakland Man

(EXCLUSIVE DISPATCH)

SAN BERNARDINO, Sept. 17.—With the identifying today by officers of the torn and skull-crushed body found by motor tourists in a shallow grave along the National Old Trails Highway in Cajon Pass last week as that of N. M. Lucasen, of 615 Fallon street, Oakland, 60 years of age, Sheriff Walter A. Shay directed a State-wide search for J. Williams, who left Oakland with Lucasen nearly two months ago in the murdered man's car.

A blood-spotted slip of paper, a sales slip of an Oakland service station, apparently overlooked by the murderer as he stripped the victim, led to the identification of the body, which had been torn by coyotes that found the grave in the mountains.

The sales slip was found in Lucasen's coat by Sheriff Shay. It was a slip of paper from the service station, which had been torn by coyotes that found the grave in the mountains.

The slip was found in Lucasen's coat by Sheriff Shay. It was a slip of paper from the service station, which had been torn by coyotes that found the grave in the mountains.

# WRECK OF DESTROYERS ON REEF FORETOLD STRANGELY IN MAP FOUND BY MERCHANT

(EXCLUSIVE DISPATCH)

SAN BERNARDINO, Sept. 17.—That the wrecks of seven United States destroyers on Honda Reef a week ago were predicted in an uncanny way two weeks before the sea tragedy was told today by Supervisor Howe Dederick of Carpinteria. An Ojai merchant, unpacking a case of cotton goods from South Carolina, came on a roughly drawn marine map, done up in the center of the shipment.

The map shows the Pacific Ocean and has a line started from San Francisco, drawn two-thirds the distance toward a point marked Los Angeles. There the line abruptly stops, and as a marginal note are the words "three weeks from Saturday lots of ships plenty trouble."

The line stops exactly where Honda Reef would be located. Because of the uncanniness of the affair the Supervisor had not told of the circumstances until today.

The line stops exactly where Honda Reef would be located. Because of the uncanniness of the affair the Supervisor had not told of the circumstances until today.

# HINDOO IS HELD IN CHECK CASE

Confesses at Fresno He Was  
Mysterious Dry Agent

Some of His Operations  
Caused a Furore

Prominent Citizens Raided  
on His Affidavits

(EXCLUSIVE DISPATCH)

FRESNO, Sept. 17.—Sunder Singh, Hindoo gardener held in jail here on a bad check charge today, was identified by Dist. Atty. William R. McKay of Kings county as being, by his own statement, the mysterious G. John, erstwhile liquor operative for Prohibition Agent T. J. Nicely. John signed several affidavits, alleging sale of liquor by well-known Fresnoans. They were made the basis for search warrants and raids.

The best known of these cases was that of T. J. Collins, pioneer Fresno hotel man, who was accused by John of having sold liquor in his home. Collins declared the charge false. He was cleared of a possession charge at his preliminary hearing, and last Saturday the case was finally closed by destruction of the evidence and release of sealed liquor in the Collins home on orders of United States Attorney Joseph Burke of Los Angeles.

Dist. Atty. McKay said Sunder Singh recently applied for a position as a liquor operative in Kings county, stating in his own behalf he was the unknown G. John whom Nicely had used and that he had signed the various affidavits that have caused the furore here.

Singh, according to information given the police, was at one time employed as a gardener at the Collins home.

VERDICT OF SUICIDE

Bad Health Caused Henry Moya to Kill Self

(EXCLUSIVE DISPATCH)

SANTA ANA, Sept. 17.—A verdict of suicide was returned here today by a Coroner's jury in the death of Henry H. Moya, 37 years of age, and head of the coroner's agency here. Moya ended his life yesterday by a rifle bullet in his brain at his home, 501 East First street. His health was assigned as probable cause.

He was unmarried and resided with his mother, Mrs. A. C. Moya. His father is a pioneer real estate man here. A brother, L. A. Moya, resides at Visalia, but is visiting here. The three men came here Saturday from Visalia, after a proposed hunting trip had been abandoned on account of Moya's health.

TO BOOST HUNTINGTON

(LOCAL CORRESPONDENCE)

HUNTINGTON PARK, Sept. 17.—A party of Elks from the local lodge will leave here tomorrow for Eureka, where they will attend the sessions of the State meeting of the organization. The local lodge members will have a float in the parade to be given during the convention in Eureka. One thousand Chamber of Commerce folders of this city will be distributed at the convention.

DRINKING DRIVER FINED

Santa Ana Pays \$100 in Court For Drink of Liquor

(EXCLUSIVE DISPATCH)

ORANGE, Sept. 17.—When Amanda Trujillo of Santa Ana left El Modena yesterday, he might have been able to pilot his machine in a manner that would comply with the law, but in a remarkably short time, Trujillo, police say, underwent a transformation in his automobile driving.

En route to Orange, he picked up a companion. Said companion, Trujillo told the court today, gave him a drink of liquor. After reaching Orange, the pair smashed into a car driven by Fred Price. Trujillo's companion, whose name was not learned, is asserted to have become pugnacious with Price. Trujillo pleaded guilty to a charge of driving an automobile while intoxicated.

"I took a little shot," he admitted, "and the judge, 'Til give you another shot; \$100 please."

FRENCH ASTRONOMER  
PRAISES MT. WILSON

(EXCLUSIVE DISPATCH)

PASADENA, Sept. 17.—Declaring that Mt. Wilson was one of the best observatories he had ever seen, Prof. Charles E. Morvan, distinguished astronomer from the Paris Observatory and head of the French scientific mission in the United States, arrived in Pasadena today. He is at the Maryland Hotel. Prof. Morvan was accompanied here by Mr. De Valle, also of Paris. Mrs. Dorothy Roberts of San Francisco and Lieut. Bernard C. Bailey, United States Coast Artillery commandant at Ft. Rosecrans, Point Loma.

# FORD CITY SURVEY IS PROTESTED

Some Residents Say Mayor  
Wrongfully Withheld the  
News From Washington

(EXCLUSIVE DISPATCH)

TAFT, Sept. 17.—The proposed surveying of the streets in Ford City by government surveyors brought a lively argument at a meeting of the Ford City Trustees. The storm center, appeared to be over Mayor Buck Campbell, who was openly accused of having withheld information relative to surveying matters from the citizens of the town site.

A delegation headed by Cory Davenport, residing in Ford City, severely criticized Mayor Campbell for his actions. A number of other citizens voiced the belief that everything had been handled for the best interests of the community.

No definite action was taken other than to discuss the situation. Mayor Campbell insisted that the surveyors would lay out the town site streets to suit residents of the community, while Davenport and other residents of the district declared information received by Campbell from Washington was to the effect that the streets would be surveyed eighty feet wide, with all lots 50 by 150 feet in dimensions.

The protesting group declared such survey plan would compel many residents to move their houses and stores.

**Southland Gain  
in Tax Returns  
Leads Country**

(EXCLUSIVE DISPATCH)

BAKERSFIELD, Sept. 17.—Southern California will lead every other unit in the United States in increase in individual income tax returns, according to Rex Goodell, Collector of Internal Revenue for the district, in a report of 33.8 per cent in the returns filed in the district as a whole. In 1922 only 165,348 individual returns were filed in the district, while in 1923 they totaled 221,026, a gain of 35,678.

Even counties which in the list of Southern California counties for number of returns filed in 1922 and 1923 were: Bakersfield, 1922, 2300; 1923, 2641; Delano, 1922, 125; 1923, 80; Fresno, 1922, 541; 1923, 710; Maricopa, 1922, 290; 1923, 570; Taft, 1922, 2340; 1923, 2730.

E. W. Williams in Deputy Collector in this district with offices in the Courthouse.

**FREE UNDER BAIL ON  
WRIGHT-ACT CHARGE**

(EXCLUSIVE DISPATCH)

UPLAND, Sept. 17.—Arrested by Special Officers Roth and Jacobs while patrolling the vineyard country to the south of this city, L. A. Cox of San Dimas, charged with transporting intoxicating liquor in violation of the Wright act, was at liberty tonight on \$500 bail for failing his arraignment this morning in Judge George R. Crane's court. Arresting officers claimed what they declared to be two quarts of corn whisky in Cox's motor car when they placed him under arrest. No date for his preliminary examination has yet been announced.

# NEW ANGLE IN TINGLEY CASE

Theosophist Says She Can't  
Pay \$100,000 Judgment  
Is Willing, but Asserts Doctor  
Claims Money

Court Orders Physician and  
Wife to Appear

(EXCLUSIVE DISPATCH)

SAN DIEGO, Sept. 17.—Miss Katherine Tingley, head of the Theosophical Universal Brotherhood and Theosophical Society at Point Loma, is anxious to pay the judgment of \$100,000 returned against her in March, 1921, in favor of Mrs. Irene M. Mohr, but cannot do so, because of her financial straits, she said today in a statement.

She said she had been ordered to pay the judgment, according to a complete filed today in Superior Court by the Theosophical Society.

Miss Tingley obtained a court order directing the Mohrs to appear next Monday at the new angle of the famous litigation, against the decision of which she appealed to the State Supreme Court and last week.

Persons here familiar with the sections of the civil code pertaining to the rights of the husband to control community property and in his opinion that Mrs. Tingley's action today may be the definitely the final settlement of the case.

In concluding the unique complaint, Mrs. Tingley asked: First, that a court order be

# DAILY MARKET LETTER OF THE NEW YORK COMMERCIAL

(EXCLUSIVE DISPATCH)  
NEW YORK, Sept. 17.—There was active demand for California raisins today, and the market advanced 25 to 50 cents per box. The association will put on a six weeks' campaign on carton raisins in New York on or about October 1, he said, and it is planned to change the advertising policy of the association in future to provide for continuous advertising, rather than short campaigns once or twice a year.

Members of the trade received with interest the opening prices on California raisins named by the Sun-Maid Raisin Growers. The prices are rather higher than anticipated, buyers declared, but they wish more time to compare the prices with old-crop raisin prices and the prices of the independents before taking action.

**CANNED FOODS**  
California canned fruits are showing a stronger tone, and unsold offerings of the leading packers are getting smaller. Trading in raw sugar futures was unchanged to 2 points higher, and trading during the day was at or close to initial figures. The close found the list 1 to 7 points net higher on sales averaging only about 5500 tons. December and March contracts were switched at a net difference of 70 points.

**SUGAR**  
Actual sugars sold at a basis of 4 to 8 cents, cost and freight.

**COFFEE**  
In coffee futures, gains of 10 to 18 points were recorded on a turnover running into some 34,000 bags. Futures were unchanged to 10 points higher on the call, with considerable small lots of buying of December and March in evidence on the way up to 8.30 cents for the former and 7.90 cents for the latter, net gains of 10 to 15 points having been established. Later,

**TEAS**  
The inquiry for Congou teas showed a further sign of expansion at the start of the week, with rumors in evidence that orders for upward of 4000 cases were in sight. The feature of the market is the comparatively large volume of trading between dealers.

**RICE**  
All blue rice and fancy head rice are being sold out prior to arrival of steamer here. All grades of foreign rice continue in extremely firm shape.

**BUTTER**  
The butter market opened firm and prices were easily advanced 1/2 cent a pound. Call sales were 25 tubs at 47c and 25 tubs at 48c, cents for spot delivery.

**EGGS**  
The egg market opened firm. Call sales were five 50-case lots No. 1 dirties at 27 1/2 cents, spot delivery, and one car storage delivery, buyer this year, at 23 1/2 cents. Pacific Coast white extras, 50 to 54 cents; white extra extras, 46 to 50 cents; firsts, 42 to 45 cents.

**LEAD**  
Independents have raised the price on lead to 7 1/2 cents New York and 6.8 cents St. Louis, but the leading interest continues to quote 6.45 cents New York. The London market reacted, spot registered a drop of 2 1/2 to 125 1/2 and futures a loss of 5 1/2 to 125 1/2.

**ZINC**  
Zinc was unchanged at 6.45 cents a pound in St. Louis. London dropped 1/2 to 122 1/2 to 5d, but futures held firm at 123 1/2 to 5d. Practically all future deliveries and positions of straits and straits shipments in closed at 49 3/4 cents a pound with spot and prompt commanding a premium of one-eighth of a cent. London cables standard spot as firm and unchanged at 119 1/2 to 119 1/2; straits also was firm at 119 1/2 to 119 1/2.

**COPPER**  
Copper dropped another eighth of a cent and at the close electrolytic was 13 1/2 to 13 3/4 cents a pound delivered. London cables standard spot as declining 7 1/2 to 152 1/2 to 5d and futures 15 to 153 1/2 to 5d, while electrolytic was 10 1/2 to 10 3/4 for spot and 10 1/2 to 10 3/4 for futures.

**PETROLEUM**  
Standard Oil of New Jersey has cut gasoline 1 cent a gallon throughout its distributing territory. In addition, Standard of New Jersey has reduced prices of gasoline on the way up to 8.30 cents for the former and 7.90 cents for the latter, net gains of 10 to 15 points having been established. Later,

**TEAS**  
The inquiry for Congou teas showed a further sign of expansion at the start of the week, with rumors in evidence that orders for upward of 4000 cases were in sight. The feature of the market is the comparatively large volume of trading between dealers.

**RICE**  
All blue rice and fancy head rice are being sold out prior to arrival of steamer here. All grades of foreign rice continue in extremely firm shape.

**BUTTER**  
The butter market opened firm and prices were easily advanced 1/2 cent a pound. Call sales were 25 tubs at 47c and 25 tubs at 48c, cents for spot delivery.

# MARKET STATISTICS

(Furnished by Miller, O'Brien & Dobbs, Inc., Members Los Angeles Stock Exchange)  
**COURSE OF PRICES**  
Twenty rails . . . . . 87.41  
Twenty industrials . . . . . 93.97

United States Steel common . . . . . 88.37 1/2  
California Petroleum . . . . . 12.12 1/2  
General Motors . . . . . 12.50  
Southern Pacific . . . . . 86.37 1/2  
Anasconda . . . . . 48.00  
Union Oil of California . . . . . 100.00  
Outman United . . . . . .06 1/2  
United Eastern . . . . . 1.60  
Southern California Edison . . . . . 102.00  
September wheat . . . . . 4.39 1/2  
Call money (per cent) . . . . . 4 1/4  
Sterling . . . . . 4.54

**BONDS**  
Foreign bonds moved lower, though the balance of the list showed minor changes. Drop in call money to 4 per cent steadied the close, but in most instances closing prices were fractionally under the opening levels. Bonds reported to be selling Liberties freely on all advances in the market, though most of the large transactions have been done of late in the outside market. Liberties closed generally higher. Pressure was exerted against medium and low-priced rails. Public utilities attracted fair buying. Oil bonds were lower in sympathy with stocks.

**RUBBER MARKET**  
NEW YORK, Sept. 17.—There was little change in the price of crude rubber today and the demand was small. Slipped slightly and first later spot were offered at 2 1/2, lower than this, close, 2 1/2, earlier No. 1, 2 1/2, earlier No. 2, 2 1/2.

**ROAD RULING FAVORS POPULOUS COUNTIES**  
ARIZONA HIGHWAY FUND CASE TO BE LAID BEFORE LEGISLATURE

(EXCLUSIVE DISPATCH)  
PHOENIX, Sept. 17.—Under the new order in the Highway Department, the State and the counties of small population get less and the populous counties get more of the State receipts for road purposes. Had the Governor's veto stood, with respect to certain sections of the highway bill, the State would have spent all funds collected. Now the State gets only 25 per cent, the balance apportioned to the counties with respect to their assessed valuation, with the exception to be done jointly by the counties and the State Engineering Department.

**FAVORS RIVER PACT**  
TUCSON (ARIZ.), Sept. 17.—Al C. Bernard, veteran Arizona legislator, a Democrat of the conservative wing, has just returned from a trip through Central and Southern Arizona, where he has been sounding sentiment with reference to the ratification of the Colorado River compact. He found much anti-pact sentiment in Phoenix, but elsewhere a strong majority favored it. He believed Gov. Hunt has killed his political future because of his attitude on the question.

**ITALIAN NAVY TO RECEIVE SALUTE IN PIREAS PORT**  
(BY CABLE-EXCLUSIVE DISPATCH)  
ROME, Sept. 17.—On Wednesday a full Italian naval squadron, composed of two dreadnaughts and a number of destroyers, will go to Pireas Harbor to receive the Greek salute. Vice-Admiral Sotiri will fly his flag from the dreadnaught, Conte Di Cavour. Great Britain and France will each send one cruiser.

**AUTO ROBBERS' ROOST FOUND IN MOUNTAINS**  
REPORTS CHARGE MECHANICS ON RANCH ALTERED MACHINES

(EXCLUSIVE DISPATCH)  
MIAMI (FLA.), Sept. 17.—A "robbers' roost" of unique sort is reported to have been found in the Muguellon Mountains north of Silver City, New Mexico. But the four there, which was not of horses, cattle or jewels, but automobiles, that had been stolen to the east or west and driven to the lonely ranch for transformation. It is reported that the gang specialized in light cars. Skillful mechanics at the ranch patched motors and obliterated numbers and repainted and altered till a machine would be changed past all possible identification.

**PLAN RESUMPTION OF STATE HIGHWAY WORK**  
(EXCLUSIVE DISPATCH)  
HOLYVILLE, Sept. 17.—Construction of the State highway east of here leading toward the sandhills will be resumed early next month, according to representatives of Oswald Brothers, Los Angeles contractors, in charge of the work. The work was discontinued on the arrival of hot weather early this summer, leaving about nine miles of pavement to be laid. This pavement is part of the Robert E. Lee National Highway.

## MEXICO PLANS BANK SYSTEM

Country to Build Firmly After Federal Reserve

Standard Oil Employees Are Heavy Stockholders

Shell Union Issue Forecast; Business News

Development of a national banking system predicated on features of the Federal Reserve System and of the Bank of England, is the immediate task of the Mexican government has entered upon following its recognition by the United States. Bankers understand that this is one of the important steps that the Mexican government has put in motion with the intention of completely rehabilitating the economic position of the country.

Business in Mexico is working under heavy handicaps because of an archaic currency system dating from the early revolutionary days. The administration prior to the Obregon government resorted to the practice of dishonoring the currency system of their predecessors until the public lost confidence in currency issues, and paper became almost obsolete. To remedy this situation the Obregon government has placed plans for the establishment of a new bank before American, British and French bankers who, as stockholders in the present Banco Nacional de Mexico, will be asked to underwrite the new bank to the extent of nearly 50 per cent of its final cost. The new bank will be known as the Bank of Mexico. It will be the only bank of issue in Mexico and will be created to the extent of \$1 per cent or more by the Republic of Mexico. The balance of stock will be owned by the present stockholders of the Banco Nacional. While control will be in the hands of the Mexican people the institution will be operated and managed by private interests subject, of course, to Mexican laws, but entirely independent of political considerations.

Aurustino Legoretta, manager of the Banco Nacional, has placed the plans before Adolfo de la Huerta, Finance Minister. It is understood, and while formal announcement of his approval has not yet been made, it is reported privately that little is to be expected on this point. Evidence that the plan was meeting with success was indicated by a recent dispatch that E. R. French, representing the International Bankers' Committee on Mexico, had left the City of Mexico for New York. It is expected that he will report to the international group on the present status of the new bank.

The new National Bank of Mexico will have the sole power in that country to issue currency bills. The bank will be operated by equal amounts of gold held in the vaults of the Bank of Mexico. It is also understood that the bank will have authority to discount notes of other Mexican banks, a process that will relieve such banks from the danger of having too many frozen credits. This was a condition which recently brought Colombia to the verge of a panic, which was averted when the government established an issue bank and authorized it to take over notes of other Colombian banks and advance cash in return.

**BANKERS IN EUROPE**  
The drift of New York's most prominent bankers to Europe in the last few months has provided inspiration for conjectures that something more than a perfunctory interest is being taken in prospective financing. Eastern dispatches say that the bankers have in each case denied that they were on more than a vacation, but that the financial community persists in attaching importance to the exodus.

Among the financiers now in Europe are J. P. Morgan, Otto Kahn, James Speyer, Francis H. Simon and George F. Baker, who sailed a few days ago. Others who have returned recently include Thomas W. Lamont, Mortimer Schiff and Charles H. Babin.

**EMPLOYEES' STOCK**  
Of the 12,613 eligible, \$5.79 per cent of the Standard Oil of California employees have invested \$12,042,581 in stock of the company from the accumulation of their own savings and from the bonuses paid to them since the stock investment and savings plan.

## DAILY TRADE TALK

Lumber Dealers Watching Los Angeles; School Children Save Millions; Comment

BY CHAPIN HALL

Lumber dealers in the United States who fail to keep close observation on Los Angeles will have an ex parte view of what may be expected and planned for future activities. This is the deliberate conclusion of important dealers who never permit their respective ears to get very far away from the ground. Congestion on the San Pedro wharves has been cleaned up, and the demand is assuming the proportions attained last spring before the mills began to ship unaided stock. Los Angeles is the world's greatest lumber port, and at the beginning of the theoretical quiet season the demand is moving back to record proportions.

Write your own ticket.

**THE REAL SAVERS**

The children of the country are assuming an important place as savers. The thrift campaign conducted by the government is taking hold. This school year, if the children learn to save systematically, if they are taught and intelligently grasp the lesson of compound interest, an important step will have been taken toward individual independence.

During the school year 1922-23 deposits by the children of the country in their school savings bank systems aggregated more than \$9,500,000, according to data compiled by the American Bankers' Association. Reports on the rapid growth of the movement are expected to attract particular attention at the annual meeting of the division during the convention of the association to be held in Atlantic City next week.

W. R. Morehouse, vice-president of the Security Trust and Savings Bank, has been one of the most enthusiastic promoters of school savings, and has been instrumental in leading the way in Los Angeles and vicinity. He will talk to the savings bank division of the A.B.A. on Tuesday afternoon at the "Newspaper Advertising for Savings Deposits."

Primary figures from the school savings report show that this year's total is an increase of \$1,500,000 over the year 1921-22. The rapid increase in the number of pupils participating in the school savings systems is shown by the following figures for the report 1919-1920, 1920-1921, 1921-1922, 1922-1923, 1923-1924, 1924-1925, 1925-1926, 1926-1927, 1927-1928, 1928-1929, 1929-1930, 1930-1931, 1931-1932, 1932-1933, 1933-1934, 1934-1935, 1935-1936, 1936-1937, 1937-1938, 1938-1939, 1939-1940, 1940-1941, 1941-1942, 1942-1943, 1943-1944, 1944-1945, 1945-1946, 1946-1947, 1947-1948, 1948-1949, 1949-1950, 1950-1951, 1951-1952, 1952-1953, 1953-1954, 1954-1955, 1955-1956, 1956-1957, 1957-1958, 1958-1959, 1959-1960, ## 7%—from the Sea

**Why Van Camp Sea Food, First Mortgage, Gold Bonds are an Exceptional Investment—**

THE safety of your money is your first consideration, and the income you get from it the next—you should consider both.

The Van Camp Sea Food Co. is the largest packer of tuna in the world. It owns its own fishing boats, the houses where its fishermen live and a plant with a daily capacity of 700 tons for tuna and sardines. The company's fixed assets are nearly two million dollars. Its products are distributed in nearly every city in the United States and foreign countries.

Earnings for the five-year period, ending December 31st, 1920, after allowance for depreciation, averaged \$385,000 per annum or more than 6.4 times the interest charges on the bonds. And the outlook for the future is far better than in any previous time, for retail stocks are low and the company has tentative orders for all the tuna it can pack in the 1923 season.

**Van Camp Bonds are Safe and Productive of Good Income**

**don't be caught with a boxful of LONG TIME BONDS**

If you know the average price of long-time bonds you say how carrying would decline from \$100 to \$200 per \$1000 bond during the next two to four years, what would you do?

There are many short-time issues of excellent security and showing a return of 6% and better, that can be utilized for the temporary investment of your funds.

We are advising our clients to buy these short-time bonds because we believe long-time bonds will be bought later on considerably cheaper than they are today.

Read what the famous statistician, Mr. John Moody, thinks of our plan. No obligation in taking for it; and it may save you money. Also no need to write. Use the coupon below or phone us.

## LOS ANGELES EXCHANGE

Under pressure supplied by reports that the company contemplates the issuance of new common stock, Southern California Edison Co. declined 3-4 points yesterday on the Los Angeles Exchange. The decline was checked by the appearance of buying support before the close assumed any proportion.

Trading in other oil securities was almost at a standstill although the sales that were made took place on a declining price level. At a final price of 29 1/4, General Petroleum common lost 1-4 of a point, and Standard Oil of California dropped the same amount to 43 1/4. United Oil scored an advance of 1-4 to 31 3/4.

Transactions in bonds reached substantial totals, with dealings running through a variety of issues. At 98 5/8 San Joaquin Light and Power series C 6s of 1926 were up 1-8, and California-Hawaiian 5s of 1926 climbed 1 point to 103. Southern California Gas 5s of 1925 were traded in at 98 1/4, and Pacific Gas and Electric 5 1/2s of 1925 were taken at 95 3/4. Edison 6s of 1924 were active.

Following are the closing quotations and sales:

## DR. STEINMETZ IN TALK HERE

Expert Declares Electricity  
Has Unshackled Man

Hints at Future Triumphs  
for His Specialty

Will Deliver Address Tonight  
at University

"Will the world get its future driving power from great power sheets belting the globe on waves measured in millions of kilowatts, thrown out from a mighty central sending station? Will science ever find the super-electro-magnetic waves that will make such power transmission possible?"

These were among the interesting questions asked yesterday by Dr. Charles P. Steinmetz, chief consulting engineer of the General Electric Company, in his address before the Electric Club at the Hotel Alexandria.

"If you want to do anything quickly and efficiently, do it electrically," said Dr. Steinmetz. "The speaker declared that modern civilization is not only different but that it is better than previous civilization, saying that this fact is due to the growth in mechanical genius among men."

**SLAVES UNFETTERED**  
"Not only have numberless thousands of men been relieved from the necessity of physical drudgery through the discovery and manipulation of electricity, but the slavery of ignorance and superstition has also been largely eliminated thereby," said Dr. Steinmetz. "Knowledge among the masses has advanced with the invention of new electrical devices and every man, woman and child shares in the benefits derived from the use of this magic power."

"One of the factors that distinguishes our present civilization from those of the past lies in the fact that people today are not dependent upon their immediate surroundings for the necessities and luxuries of life," the speaker said.

**SPACE ANNIHILATED**  
"Man has practically annihilated space, especially since he has learned how to transmit electrical energy for miles and to convert that energy into those various forms of power utilized by society," said Dr. Steinmetz. "The glory of electricity is that it can be distributed in any quantity without waste, to be used for light-

## EINSTEIN THEORY UPHELD

Lick Observatory Astronomer Tells Scientists That  
Observations Prove Gravitation Hypothesis

Scientific observations, made during total eclipses of the sun by entirely different instruments and methods, are in close agreement with the conclusions of Einstein's generalized theory of relativity, leading to the conclusion that light is subject to gravitation and Einstein's law of gravitation is more accurate than Newton's law.

That was the announcement of Dr. R. J. Trumpler, assistant astronomer of the Lick Observatory, Mount Hamilton, Cal., who yesterday afternoon delivered an address on relativity as represented by the Einstein-eclipse problem before the seventh annual meeting of the Pacific division and Southwest division of the American Association for the Advancement of Science. The lecture was delivered in Board Auditorium, University of Southern California.

During the last few years, Dr. Trumpler explained, a new method has been added to the observation program for total solar eclipses—the determination of the light refraction in the sun's gravitational field. The attention of astronomers has been especially attracted to this problem by Einstein's theory of relativity and the importance of these observations lies in testing one of the necessary consequences of Einstein's theory, Dr. Trumpler said. The problem is: Are rays of light influenced by gravitation when they pass near a heavy massive body such as the sun, and if they are, how much are they deflected from their normal straight path?

**EFFECT ON RAYS**  
In other words, Dr. Trumpler explained, if light is subject to gravitation, a ray of light originating in a very distant star will be curved when passing near the sun. The displacement is largest for a star seen near the sun's limb, while it rapidly diminishes for stars situated in the sky farther away from the sun. And it is, of course, only during a total solar eclipse that stars can be observed or photographed in that part of the sky which is immediately surrounding the sun.

In 1884 and 1911, Dr. Trumpler stated, Einstein first took up the problem. His special theory of relativity and his so-called principle of equivalence led him to the conclusion that light energy must have inertia and therefore mass. At that time Einstein used Newton's Law of Gravitation and made certain announcements relative to the degree of displacement of a star at the sun's limb. But, in 1915, the lecturer continued, Einstein generalized his former theory of relativity so as to extend it to the phenomena of gravitation, adopting a new law of gravitation differing by small amounts from Newton's long-established law. And

ing, heating or mechanical purposes. Dr. Steinmetz will speak again this evening at Millspaugh Auditorium, University of California, Southern Branch, on the subject "Electrical Power in Industry." Richard E. Smith, president of the Electric Club, announced yesterday that the members of the organization have collected \$2144 for the Japanese Relief Fund.

**OPERATORS TO DINE**  
A luncheon to which the telephone operators of the leading hotels of the city have been invited will be given today at Paulina's by the Greeters Association. The Southern California Telephone Company has arranged for a special demonstration of its recently installed machine telephone switching apparatus, which will be followed by a musical entertainment by the employees of the company. After the luncheon, a tour of inspection of the new building of the telephone company will be made by the luncheon guests.

## EINSTEIN IDEA STRENGTHENED

(Continued from First Page)

acterized by weakness near the north and south poles of the sun and by streamers of great length stretching out to the east and west. It has been thought by most astronomers up to the present year that the corona is composed of coronal streamers, especially those near the sun's poles, are controlled by the sun's magnetic forces, but studies of coronal photographs by the Lick Observatory at recent eclipses seem to show that the sun's magnetism is not the chief influence in bending the coronal rays.

The spectrographic and polarographic observations of the coronal light show clearly that the coronal materials close to the sun are in part gaseous and in part solid or liquid particles shining chiefly because they are heated to incandescence and that the minute and cold coronas are composed of gas molecules or minute solid particles, one or both, shining by virtue of the sunlight falling upon them. The spectrum of the outer corona is the same as that of the sun itself.

As a result of the observations of its spectrum obtained in 1918 and last year in Australia provide evidence in support of the theory that the coronal materials are traveling outward from the sun, that they are being driven away from the sun by the sun's magnetism, but so slowly that millions of years would be required to produce effects appreciable to the observer.

"And there are good reasons for suspecting that the stars in general are slowly losing mass," Dr. Trumpler said. "If the stars have coronas, their coronal materials represent their gradual loss of mass."

**TALKS ON SPECTRUM**  
Dr. E. A. Mitchell, astronomer of McCormick Observatory, University of Virginia, explained how the spectrum of the sun's atmosphere is studied and how the interpretation of the results through the aid of modern physics. His lecture, which was illustrated with many slides.

The general session yesterday afternoon concluded with a symposium on half dozen topics. Astronomers who have short talks on the results of their observations of the eclipse. According to Mr. Dulany, Jr., president of the conference, the entire plant and equipment of the Duffey company was purchased at an approximate price of \$75,000.

**NEW PROCESS**  
A new process for bleaching vegetable and mineral oils by the use of catalytic action of a metal and producing clear gasoline from them by a dehydrating process.

**WILL GIVE WHIST PARTY**  
A card party will be given today at 2 p. m. by the Duffey Court Order of Amaranth, at the Masonic Temple, Pico and Figueroa streets. Whist and five hundred will be played.

**TELLS OF PLANETS**  
Dr. V. M. Slipher, president of the southwestern division of the American Association, was the last speaker of the evening, talking on "The Planets." A public reception to members and their friends and families concluded the evening. Today the scientists composing the American Astronomical Society, meeting in conjunction with the main association, will go to Pasadena. At 9 o'clock this morning an inspection of the laboratory and observatory of the Lick Observatory will give the visitors opportunity to delve into practical phases of their profession. At 10 o'clock will begin the general session, with papers scheduled for eleven speakers.

**HICCOUGHS IN MUSIC SCHOOL, POLICE SAY**  
"Strains of 'The Stein Song' reared by several husky throats with suspicious thickness, led police yesterday to investigate the music school of Mario Caszola at 118 North Spring street. They say they discovered that some of Caszola's piano pupils seemed to be making a noise like that of a violin pupil had that the instruments upside down and that some of the voice pupils had hiccougs. Officer Shuber arrested Caszola for alleged violation of the Wright Act and says he found liquor on the premises."

**THOMAS BARFOOT RETAKEN**  
Thomas Barfoot, who escaped, is now being held at the County Jail for return to Norwalk. Dymond said Barfoot had made threats against relatives and was terrorizing his family.

## BATTLE FLAMES UNDER GROUND

Strucure Struggle Two Hours  
Against Blast in  
Storm Drain

Damage of more than \$100  
was caused, and traffic over  
Victoria Drive between County  
Club Drive and Pico street  
was forced to detour last  
night as a result of a fire  
which destroyed a storm  
drain under the road at that  
point.

The drain was of  
wooden construction and is  
believed to have caught fire  
from a pile of burning trash.  
Fire Engine Company No.  
26 made the run to the fire  
and fought the flames for  
over two hours, being great-  
ly handicapped by having to  
work under ground and by  
poor ventilation.

max Engineering Company of Clinto-  
n, Iowa, makers of Clinton re-  
frigerating machinery, were an-  
nounced yesterday by George W.  
Dulany, Jr., president of the com-  
pany. Mr. Dulany, who has been  
in Los Angeles for the last  
ten days surveying the field, left  
last night for the East.

In addition to the expansion pro-  
gram the Clima-max company has ab-  
sorbed the E. H. Duffey Company,  
2018 West Seventh street, for the  
last four years local representatives  
of the concern. According to Mr.  
Dulany, the entire plant and equip-  
ment of the Duffey company was  
purchased at an approximate price  
of \$75,000.

Lyman P. George will be branch  
manager in Los Angeles for the  
Clima-max Engineering Company, and  
E. H. Duffey and his entire organ-  
ization will remain with the com-  
pany under the new regime.

**PLAN FOUR NEW  
BUILDINGS HERE**  
(Continued from First Page)

boulevard and Ivar avenue, it was  
announced by Gilbert Beesemer,  
secretary and manager of the  
Municipality Building and Loan As-  
sociation. The building is to cost  
\$140,000. It will be twelve stories  
in height and will be built of  
reinforced concrete with a brick or  
terra cotta front. The contract  
for the completion of the building  
in ten months.

**PYTHIANS  
HEAR FIVE  
ADDRESSES**  
Hollywood Lodge Holds  
Constitution Day Party at  
High School Hall

Judge Hardy was the principal  
speaker on the Constitution Day  
program given by the Hollywood  
Lodge No. 358, Knights of Pythias,  
at the Hollywood High School Au-  
ditorium last night. The entertain-  
ment was open to the public and  
was attended by many residents of  
Hollywood, as well as hundreds of  
Knights.

**BEGINS INQUIRY INTO  
REPORTED KIDNAPING**  
Reports that a woman had been  
kidnaped on the streets of Bell  
Bunny night were investigated  
yesterday by Deputy Sheriff Turner.  
He discovered a woman's  
cape and purse and a handkerchief  
marked Ella, in the rear of 560  
Bell street, near the close of the  
night. T. W. Andrews, owner of  
the house, Mrs. Allen Lewis of 245  
Olive street, reported the case. She  
said while she and her father were  
passing they saw two men trying  
to put a woman into an automobile.  
The woman, she said, was holding  
back and repeated several times:  
"Don't give me any more."

**BELIEVE CLERK  
WAS KIDNAPED**  
(Continued from First Page)

had frequently carried larger sums  
than he had yesterday. The two  
employers declared their belief that  
a carefully planned robbery had  
taken place and thought the band-  
its might have been following  
Bausky for days to get a favorable  
opportunity to kidnap him.

**MAN CHARGED WITH  
WRECKING CAR HELD**  
Charged with jumping on the  
running board of an automobile  
containing two women Saturday  
night, and frightening them so that  
the woman driver ran the car into  
a telephone pole and seriously hurt  
herself and her companion, Joe  
Luvit appeared in Police Judge  
Richardson's court yesterday and  
pleaded not guilty. Mrs. Gladys  
Topping of 313 Cimarron street,  
Hollywood, was driver of the car.  
The testimony indicated that Luvit,  
in an intoxicated condition, jumped  
on the running board as the ma-  
chine passed the intersection of  
North Broadway and Serrano  
street. Mrs. Topping thought she  
was being held up, and took her  
hands from the wheel. The ma-  
chine left the street, jumped the  
curb, and crashed into a pole. Both  
Mrs. Topping and Mrs. Daphne  
Garnier, her companion, were  
hurled through the windshield.  
They were badly cut and bruised.  
Luvit was locked up, and appeared  
yesterday on charges of disturbing  
the peace and tampering with an  
automobile. Hearing was set for  
later in the week.

## MANY HONOR CENTENARIAN

(Continued from First Page)

the days news by reading to him  
accounts of all the important hap-  
penings, both at home and abroad.  
He is particularly interested in  
European affairs and follows them  
with absorbed attention from day  
to day.

**DOES MUCH WRITING**  
Aside from his interest in what  
is going on in the world, the cen-  
tenarian also devotes a good deal of  
time to writing and looking after  
his business. He never could get  
used to a secretary, according to  
his daughter, and writes every-  
thing out in his own hand, despite  
his failing sight.

As an example of what he is  
doing in a business way, members  
of his family stated that the old  
gentleman is now planning the  
erection of a four-story apartmen-  
house at the corner of Santa Mon-  
ica Boulevard and Vine street. This  
is a project he has had in mind  
for some time, and he announced  
recently that he was going through  
with it at an early date.

He maintains an office in the  
Lankershim Building, and while he  
does not appear there every day, he  
is to be found at his desk often  
enough to keep in close touch with  
his business interests. In addition  
to the office he prefers to travel  
on the street car. He is somewhat  
averse to the automobile, never  
feeling exactly sure when whirling  
along in a speedy machine.

**RECALLS WAGON JOURNEY**  
Among the incidents of his long  
life which he recalls with especial  
pleasure is his trip across the coun-  
try in a covered wagon. From New  
York, the State of New York, to  
California, in the latter part of  
1850, he was one of the pioneers  
of the wagon trail. He and his wife  
and children, of whom but few re-  
main, who responded to the call of  
gold when that alluring prospect  
was discovered here.

He also recalls his life as a  
member of Congress during the  
Civil War, and his attendance at  
the field of Gettysburg when Presi-  
dent Lincoln made his immortal  
speech.

Senator Cole attributes his long  
life to the fact that he never per-  
mitted anything to worry him. He  
was blessed with a magnificent  
physique, and has been careful to  
conserve his strength. He had  
never been confined by illness up  
to about ten years ago, when he  
caught a cold and the members  
of his family thought it advisable  
that he refrain from getting up  
and dressed, saying, "He thought  
he had been lying down  
long enough."

**PLAN FOUR NEW  
BUILDINGS HERE**  
(Continued from First Page)

Approximately \$100,000 will be  
expended by the Signal Realty  
Syndicate on the construction of a  
four-story, class "C" store, market  
and apartment building on the  
north side of Santa Monica Boul-  
vard running through to film row  
between Serrano street and West-  
ern avenue.

Preliminary plans have been pre-  
pared by Architect Frank F.  
Rasche, 1842 Hollywood Boulevard,  
and provide for a brick structure  
sixty feet wide by ninety deep,  
with concrete foundation, cement  
ground floor, pressed brick and  
plate glass front, hardwood floors  
in the apartments, and a composi-  
tion roof. The building will con-  
tain a market and four stories on  
the first floor and the upper  
stories will be devoted to thirty sin-  
gle and double apartments.

Specifications are being prepared  
by the architectural department of  
the Board of Education for the  
erection of a new school building  
at Brooklyn and Ocean View areas  
to cost approximately \$14-  
000.

Present plans provide for a re-  
inforced concrete structure, sixty-  
two feet wide by one hundred and  
twenty feet deep, and containing  
twenty rooms. Actual building  
operations will begin about Decem-  
ber, according to an announcement  
made yesterday by the department.

**DRAFT FLEET  
PLANS HERE**  
(Continued from First Page)

A San Francisco firm and she is  
expected to be pulled off the reef  
within the fortnight by the wreck-  
ing tugs Homer and Peacock. She  
will be towed to the navy  
yard at Mare Island.

Admiral Counts will depart this  
base for San Francisco on the  
U. S. S. Albatross, the close of the  
fleet gunnery exercises on Octo-  
ber 11. He will return here with  
the fleet on October 22, but  
will proceed immediately to Pa-  
nama, leaving the Canal Zone No-  
vember 15th for New York. The  
commander-in-chief will be in di-  
rect command of the entire United  
States fleet during the winter ma-  
neuvres at the First Methodist Church. The  
public is invited.

**W.C.T.U. TO MEET**  
A special musical and speaking  
program, in observance of Con-  
stitution Week, has been prepared by  
the W.C.T.U. for 2 p. m. Thursday  
at the First Methodist Church. The  
public is invited.

**MILO MAIZE OUTPUT IN IMPERIAL COUNTY**  
BRAWLEY, Sept. 17.—Imperial county produced more than 25,000 tons of milo maize this year, according to an estimate made by E. W. Chase, grain warehouseman here. Virtually two-thirds of this crop was grown in the district north of Imperial. Harvesting of the crop is well under way, and many carloads of grain have been shipped. Chase said the average yield of milo maize throughout the valley this year was about three-quarters of a ton to the acre. The valley's milo maize crop is in great demand by poultry raisers in Northern California. The price paid so far this season has been around \$2.25 a ton.

**MUSICAL NEGRO SENTENCED**  
Clarence Stevenson, alias Henry Brown, a negro, liked music, but not so well as money. It was demonstrated yesterday in Judge Reeve's court. For purchasing numerous musical instruments on lease contracts and then selling them Judge Reeve yesterday sentenced Stevenson to San Quentin on two counts of from one to ten years each.

## WOMAN SO ILL COULD NOT WORK

Gained Strength, Weight, and Now  
Doing Own Work by Taking Lydia  
E. Pinkham's Vegetable Compound

Marion, Ind.—"I was all run-down, nervous and bent over. I could hardly drag around, let alone do my work. I read some letters in the papers telling what Lydia E. Pinkham's Vegetable Compound had done for others and I thought I would try it. Then a man told my husband about his wife and what good it had done her and wanted him to have me try it. I took one bottle and could see what it did for me in a week's time, and when I had taken three bottles I had gained both in strength and weight and was doing my own work. I took it before my last baby was born and it helped me so much. I am glad to recommend the Vegetable Compound to any woman who suffers from female ailments, for I know by experience what it can do. I have used Lydia E. Pinkham's Sanative Wash, also the Liver Pills, too, and think them fine."—Mrs. Wm. Eldridge, 620 E. Grant Street, Marion, Indiana.

A record of nearly fifty years service should convince you of the merit of Lydia E. Pinkham's Compound.

## Dark Ring Under Eyes

For the relief of dark rings and blood shot eyes there is nothing better than simple camphor, witchhazel, hyacinth, etc., as mixed in Lavoptik eye wash. The quick action is surprising. Buy cup free. At the Owl Drug Co., and all druggists.—(Advertisement)

## ACAPULCO GLAD AT RECOGNITION

Mexican Port Calls Holiday  
to Celebrate Event

Consul Reports Commerce  
Receives Stimulus

State of Guerrero's Riches  
Await Development

The announcement regarding the recognition of Mexico by the United States recently was hailed with enthusiasm by the native population, and is going to furnish a fresh stimulus to development in that country, according to George A. Bucklin, American Consul at the port of Acapulco, who is now a Los Angeles visitor.

"The citizens declared a holiday when the event became known," said Mr. Bucklin, "and indulged in celebration, with parades, brass bands, oratory and general merry-making. It will mean much for Mexico, in my opinion, not only in stimulating native enterprise, but by inspiring confidence in a number of American promoters who have been waiting for recognition before embarking in business in the southern republic."

Among other things the Consul expects to see a large increase in shipping at the port of Acapulco, which he has a natural harbor excelled by only two other places in the world, San Francisco and Adelaide, Australia.

**HARBOR EXCELS**  
"The Acapulco Harbor is landlocked and furnishes an absolutely safe anchorage in any kind of weather," he said. "In size it is capable of accommodating all the navies of the world at one time. The depth of the water right up to the shore is such as to render unnecessary the construction of an elaborate dock system. In fact, I am told that at one time the Pacific Mail boats used to tie up at the shore without any dockage facilities whatever."

A railroad is now under construction between Acapulco and Mexico City which, when completed, will link the capital with a port nearer the coast than the distance than the port of Vera Cruz. Work on this road, which was halted by the revolution, has been resumed and the road is expected to be completed, which will mean a big increase in the business of the port.

The State of Guerrero, in which Acapulco is located, is one of the richest sections of Mexico in the way of natural resources. It was from this State that Montezuma obtained most of the gold which assisted Cortes and his followers. Some of the Indian rule mines are still operated, and a number of others have been developed. The mineral wealth includes not only gold, but also vast stores of iron, copper and other metals.

**TIMBER EXTENSIVE**  
This State also has some of the greatest tracts of virgin timber still to be found on the North American continent, and I expect to see a great lumbering industry developed there in the near future. This timber includes large tracts of pine, several varieties of oak, and especially many other kinds of tropical woods, such as mahogany, ebony, rosewood and others.

The favorable climatic conditions and fertile soil of the region also offer extensive agricultural possibilities. One of the profitable products being developed there is sesame, a crop of which little is known in the United States. The sesame plant produces a seed much on the order of those from which an oil is extracted used for the same purposes as olive oil, and regarded as superior in many ways to the flax product. The first pressing yields the edible oil, and the residue is further treated so as to produce oil used in the manufacture of soap. Sesame growers, some of them Americans, have been very successful, and the advisability of introducing the plant in the cotton regions of the South in this country suffering from the ravages of the boll weevil has been considered, though I am not aware that the cotton growers here have as yet taken up sesame production.

and Fire Chiefs**

Increased salaries for Police Chief William A. Fitch and Fire Chief Scott were yesterday afternoon favored by the members of the City Council's Finance Committee also by Efficiency Director Eldridge, who reported to the committee that the fire and police chiefs were underpaid in proportion to their work and responsibilities and in comparison with the salaries paid these officials in other cities.

The chiefs are now receiving \$400 a month, and the Finance Committee is favorable to recommending that each be increased to \$500 a month, provided that the increase will not apply to Fire Chiefs O'Donnell and Ely and Police Chief Jones, pensioners, whose pensions are 50 per cent of the salaries attached to these positions.

The Council will today ask the City Attorney for an opinion if it may call for an increase in the salaries of the present and future chiefs without increasing the pensions paid the ex-chiefs.

**Griffith Park  
Zoo Project Is  
Turned Down**

Park Commissioner Griffith's plan to start a municipal zoo in the Vermont-avenue canyon of Griffith Park was set upon yesterday afternoon by the majority members of the City Council's finance committee, who voted "No" on the request, and Chairman Mushet voted "Yes."

The majority members of the committee believed that a worthwhile zoo that would be a credit to the city would cost many thousands of dollars and be opposed to embarking upon a project that would ultimately involve vast expense.

## "REMEMBER THIS" IN TOWN

Writer of Common-Sense Sayings in "Times" Pays  
One of Rare Visits to Los Angeles

R. M. Stanifer, the man whose common-sense sayings are read daily by almost 3,000,000 persons under the heading, "Remember This," came to town yesterday. Mr. Stanifer lives in Santa Barbara and rarely finds an opportunity to visit Los Angeles, but when he does he makes the most of his opportunity.

Every day in the week, every week in the year, for the past two years one of Mr. Stanifer's sayings has been printed in five newspapers of the West: The Fort Worth Star-Telegram, the San Francisco Journal, the Phoenix Gazette, the Kansas City Star and the Los Angeles Times.

**PREPARED IN MINISTRY**  
Twenty years in the ministry have prepared the common-sense apostle for his task and daily his enjoyment in the writing of these pellets of wisdom increases. "From early childhood I have had it in me to have a habit to boil down sermons, speeches and anything of importance that I hear to a simple statement of ten words," Mr. Stanifer said. "When I was a preacher twenty years ago the possibility of a large audience at one of my sermons buoyed up my spirits and instilled in me the desire to do my best. Today the same thing applies."

**TO PUBLISH BOOK**  
Mr. Stanifer is for the most part engaged in community work in Santa Barbara and writes mainly in his spare time after putting in about fourteen hours work on other projects.

The illustration that heads his daily observation is that of an old, bearded man reading from a book. This produces a psychological effect on the reader, according to Mr. Stanifer, and it enhances the serious aspect of the thought conveyed.

About 500 of his sayings will be published in book form soon by the Times-Mirror Company.

## LIQUOR-MAKER GIVEN YEAR

Court Imposes Maximum Penalty, Declaring Owner  
of Still and Women Committed Perjury

In sentencing Joe D'Aluto, of 645 Lamar street, the limit of the law for the first offense of violating the Volstead-Act, United States District Judge Bledsoe yesterday not only launched a vigorous defense of the prohibition officers involved in the arrest of D'Aluto and his wife Margaret, but declared that D'Aluto and his wife and sister-in-law had all committed perjury in the trial of the case last week.

D'Aluto was convicted on all four counts of the indictment, and he was given a year in the Orange County Jail. The counts involved possession of liquor, manufacture of liquor, the possession of a still and maintaining a nuisance on the Lamar-street premises.

**CHARGE "SMOKE SCREEN"**  
The action harked back to January 24, when Agents Neal and Wheeler made a raid on the home of the D'Alutos, captured a big still and 135 gallons of moonshine that resulted in an attack upon the officers by the D'Alutos, and the women and the women ended in the arrest of Wheeler and Neal by the State authorities as a complaint sworn out by the D'Alutos, charging them with making an attack upon Mrs. D'Aluto.

Referring to this feature of the case yesterday Judge Bledsoe said the arrest of these officers was a reflection upon the law and the law and the prohibition law and the prohibition law.

## SCHOOL PROBLEM IS ACUTE

Large Addition of Teachers and Buildings Has Not  
Solved Difficulties of Education Board

Realization of the acute shortage of housing facilities in the Los Angeles county schools may be brought home to citizens in no better way than going over the details of the report compiled by the Board of Education yesterday at the conclusion of the first week of the 1932-1933 term.

In the elementary schools there are 102,999 pupils registered, and in the high schools, 41,536, making a grand total of 144,535. These figures include a number of part-time and night-school students, but there are a number of districts that have not filed their reports.

On October 6, 1932, at the conclusion of the first school month of last year, there were 146,645 pupils registered in all departments, so, with three weeks more to run of this month this year, the difference will be much more than equalled.

The estimated registration by Board of Education officials made during the vacation period was 145,500, and it was intimated yesterday that these figures will fall short of the actual mark.

The housing problem is still acute.

## Mallard Moves Fifth Street be Paved at Once

Councilman Mallard at yesterday's session of the City Council started the ball a-rolling for the immediate paving of the new Fifth street, which has been cut through North Hill from Grand avenue to Boylston street and graded. On account of pending litigation, the paving of the new street has been delayed, so Councilman Mallard, seconded by Councilman Allan, moved that proceedings be started at once for the paving of the new street so that it would be a traffic outlet from, and inlet to the congested district.

In order to speed up the work of building the new \$1,500,000 Central Library on Normal Hill, the Finance Committee of the City Council yesterday afternoon agreed to loan the Library Board \$100,000 from the city treasury, the loan to be repaid when library bonds are sold.

## ACTRESS SAYS MATE TRIED TO DROWN HER

Declaring that her husband had caused her great mental anguish by twice attempting suicide, and once trying to drown her in Lake Michigan, Mrs. Alice Owen, vaudeville actress, yesterday filed suit for divorce against Orville Owen. According to the complaint the Owens were married in July, 1917, and shortly afterward Owen "became cold in his attitude toward his wife, and failed to provide her with the necessities of life. During their residence in Chicago, Mrs. Owen asserts, her husband attempted to commit suicide, causing her great mental distress. On one occasion tried to drive an automobile into Lake Michigan, which would have resulted in the death of both of them."

As a consequence of this treatment, Mrs. Owen says she separated from her husband in 1920. She asks \$100 per month alimony for the support of herself and 8-year-old son.

## City Attorney Wants Deputy as Answerer

Pity the poor City Attorney! Everyone in trouble comes to the City Attorney's office. City Attorney Stephens told the members of the Finance Committee yesterday that he was overworked and means to stop scolding wives from scolding; methods, under the law, for preventing neighbors' rosters from crowding and as to the status of the hundreds of public improvement jobs now in progress.

The City Attorney asks that he be given an additional deputy whose sole business it will be to answer the legal questions fired at him by the public. The Finance Committee looked favorably upon the request and will act upon it formally next Monday afternoon.

## ONE-DAY HUSBAND ACCUSED OF FRAUD

Charging her husband with swindling her out of \$1400 and disappearing on the day of their marriage, Mrs. Marie Miller yesterday filed a plea for annulment of her marriage with J. W. Miller, and for permission to resume her maiden name, Marie Smith. Mrs. Miller's complaint asserts that she married Miller on December 25, 1932, after he had told her that he was the proprietor of large woolen mills, the son of a wealthy family, and had promised to take her to his home in the East, where she would mingle in the higher circles of society. On the day of the wedding, the complaint declares, Miller told her that he had to complete a deal in Tulsa, Okla., and borrowed \$1400 from her, saying that he was temporarily short of funds. A few days later she received a letter from Miller in Oklahoma, in which he told her that he was a marine engineer, and was sailing for Singapore. She has not heard from her husband since, asserts the complaint.

How long did  
it take you  
to learn your  
business?

Every business is different in many details. It is the mastering of these details that takes time—yet, without then it could not be said that the business was thoroughly understood. In lack of the knowledge of anything lies years of experience.

It is the experience of the RUUD Company gained through over a quarter of a Century of building water heaters, that we refer to when we say we have learned the water heater business. It is easy to build a water heater. It is not so easy to perfect a heater that will give many years of service without trouble. Yet this is exactly what any RUUD will do.

RUUD—"Standard of the Water Heater"
